

BIRD STRIKE PREVENTION

Solar Powered Bio-Acoustic Bird Repellent BAR-153

Using Digital Recording of Natural Enemy's Sound and Warning sound can be emitted by Clear sound speakers.

Painful Sound and warning Sound can be emitted by High output Amplifier using Weather Resistant Speakers. So, Birds got fears and will leave the those areas.

Big Shape/Cone type speakers can emit more clear sound to more further.

Each Speakers and Motion Sensors are connected with 5meters cable.

Used for daytime birds

- Solar panel : 10W (35X28cm)
- Battery : 12V-12ah
- Built-in Solar- battery controller
- Automatic operation by optical sensor
- Continuous 4-day rainy weather
- Effective area : 65X65m = 4,225m²
- Sound frequency : 2,000~10,000Hz
- Sound Pressure: 110~120dB at 1 meter
- 8 kinds of sounds are randomly broadcast

Used for night time wildlife

Each Speakers and Motion Sensors are connected with 5meters cable.

Have Digital Sound to repel Deer, Wild Pig, Cat
The Motion Sensor is very effective to operate when the Wild animals approach.

- Sensing Distance : 7~8m
- Sensing angle : 130degree

Daegu International Airport

Chopper base
